

**COMPANY
PROFILE**

Pava[®]

**WE PROTECT
YOUR WORLD**

"In today's world there is an abundance of technology, entrepreneurs, money and venture capital. What is scarce are the big teams."

Daniel Goleman

1978

THE IDEA

The needs of the market require continuous reinterpretations. In fact, products of high quality and effectiveness, even though they have considerable potential for use, are often relegated to a secondary role, because there is no close and sincere collaboration between the manufacturer and the end user. This was the intuition that pushed Guido Bernardi, back in 1978, to give life to a structure that could satisfy this request: to create the right synergies between producer and end user in the resin formulations sector.

"Excellence in the product and continuous technical training of application personnel".

Over the years, these synergies have promoted the development of Pava Resine formulas in the field of protective floor and wall coverings, food coatings, waterproofing products, consolidating agents, from products for building restoration to the decorative sector, in many cases becoming true furnishing components.

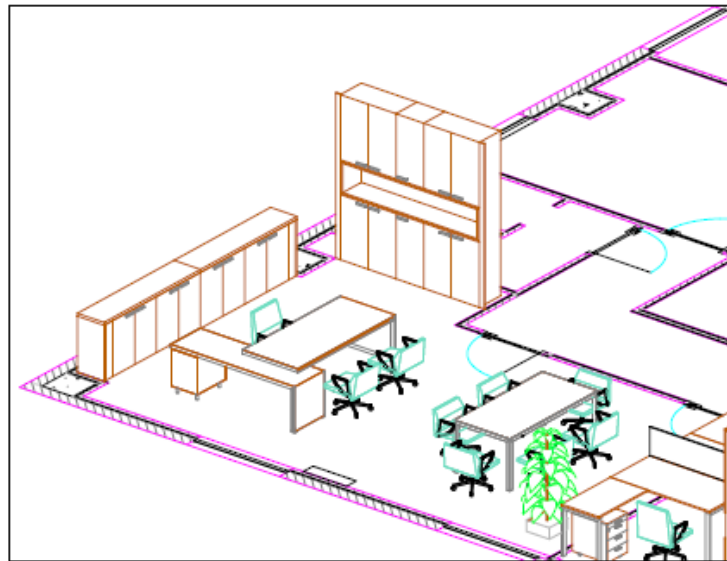

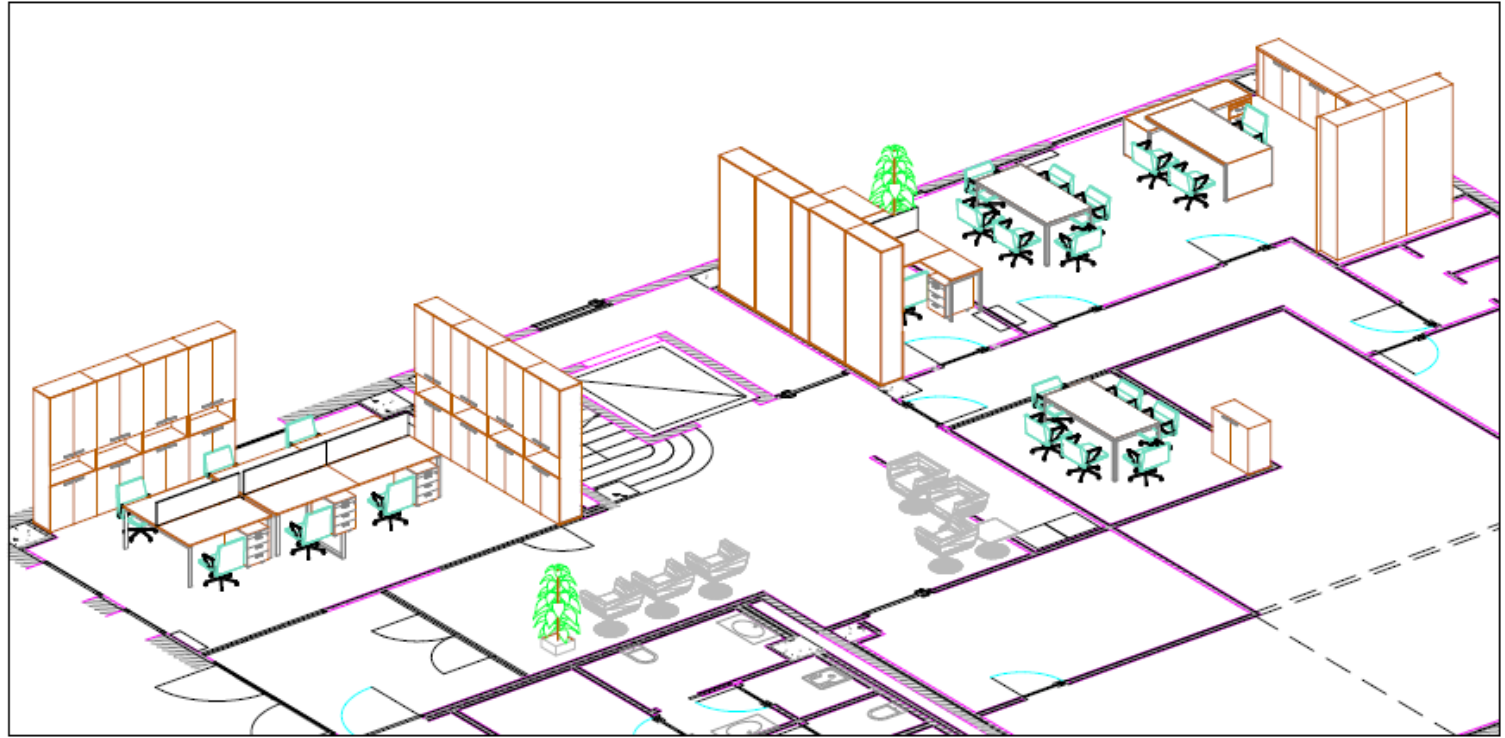

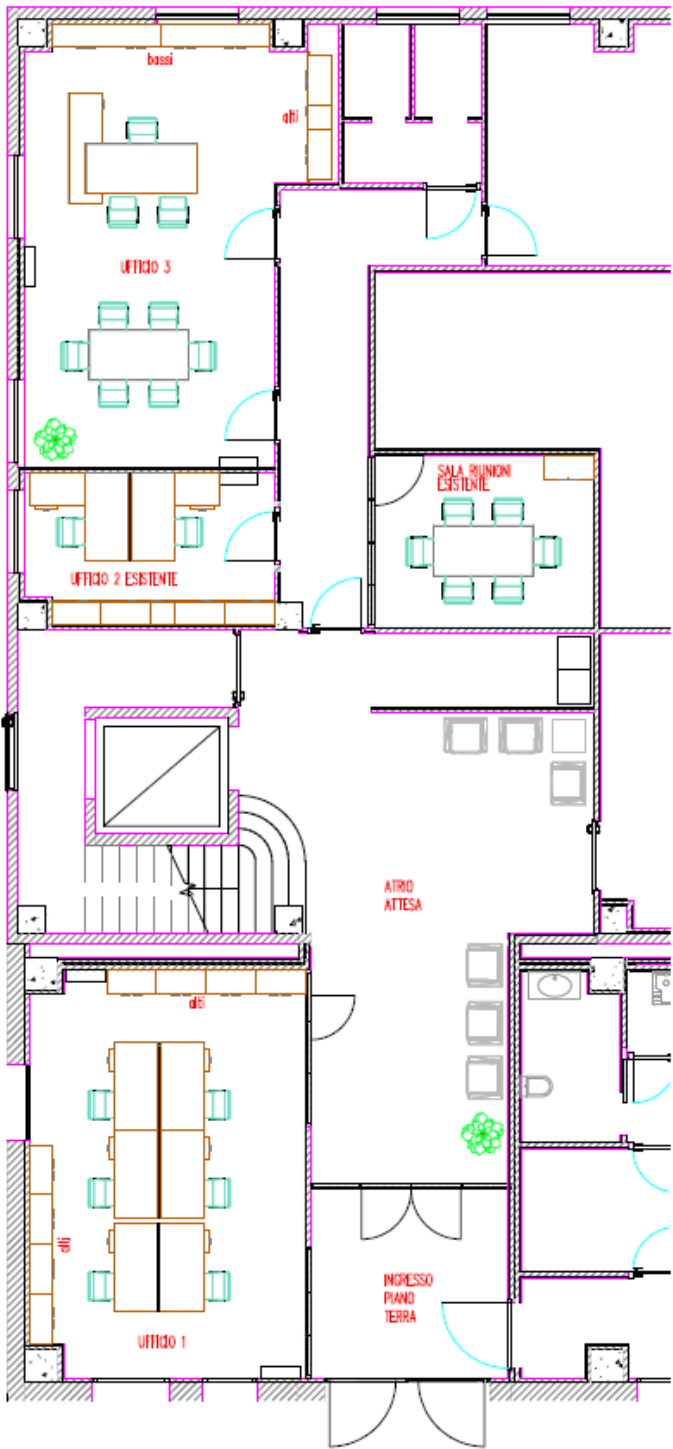

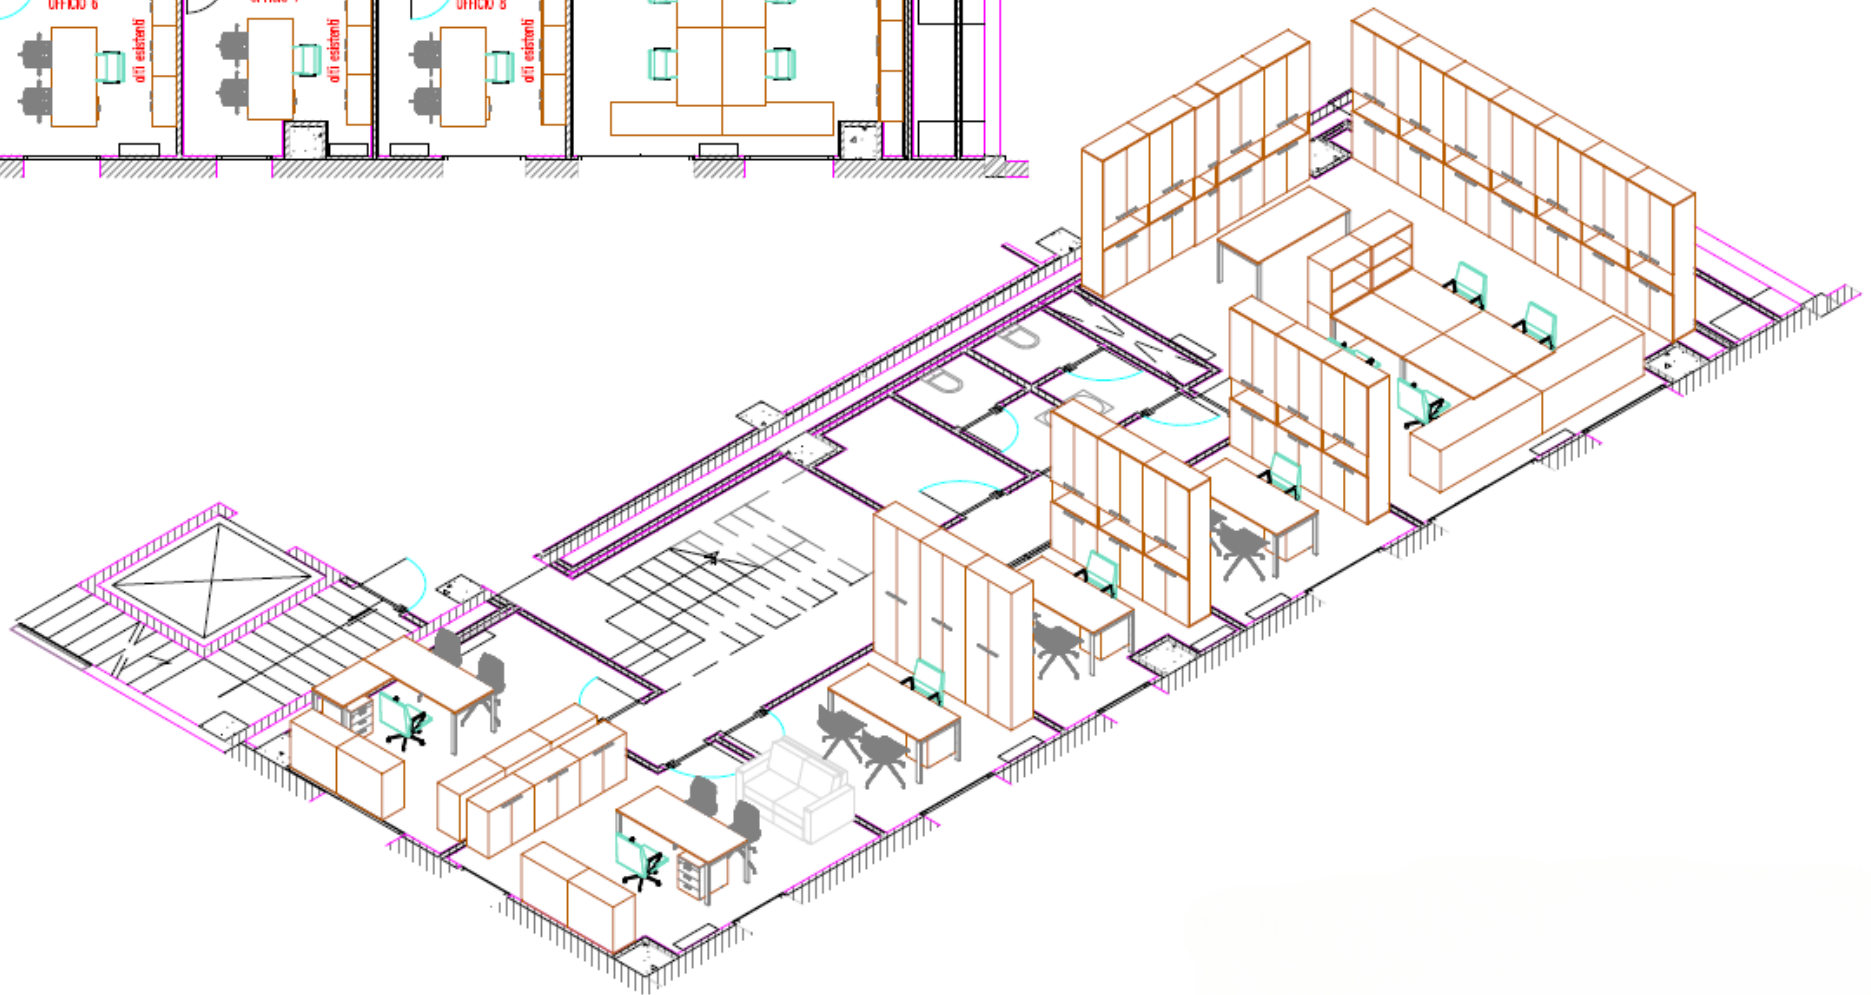

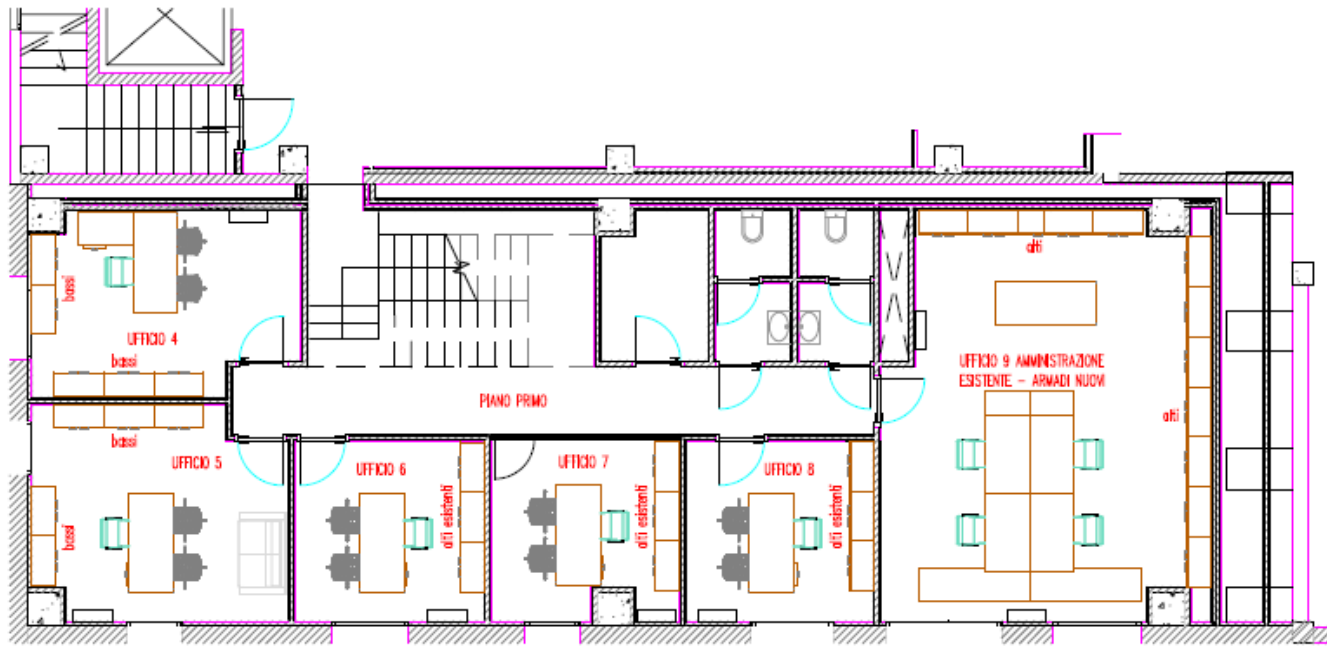

INNOVATION

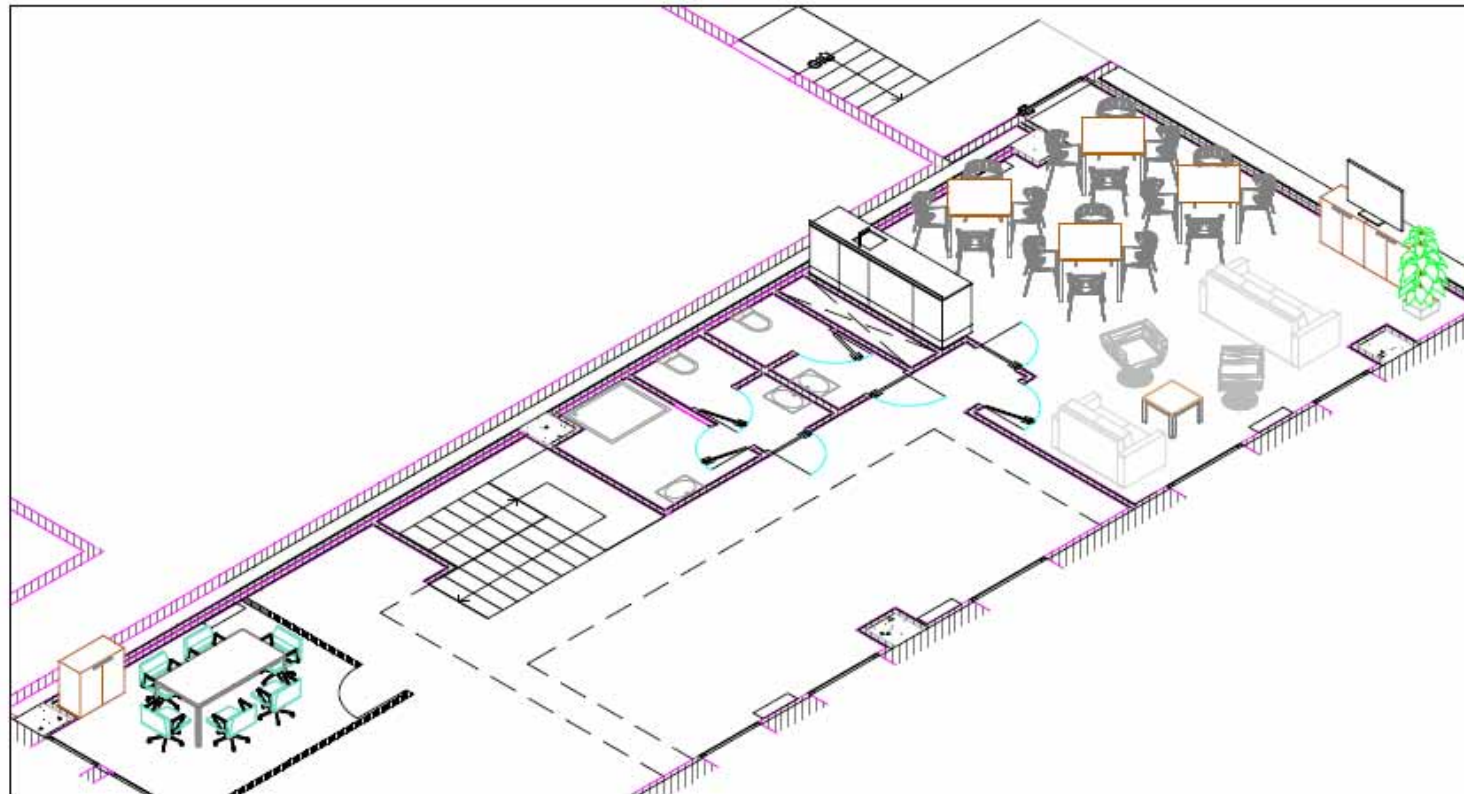

Since its inception, the company's structure has diversified and developed into distinct but obviously closely co-ordinated sections: research and development, production, storage and delivery. Significant investments have been made over the years to improve and enhance the storage and production systems.

With a production capacity in excess of tens of thousands of kg/day, and 'just in time' storage starting at 130 tons, it has been possible to move from a 'push' to a 'pull' logic, optimising production lines with considerable gains in cost and time.

"The crisis is the greatest blessing for people and nations, because the crisis brings progress. Creativity is born of anguish as the day is born of the dark night. It is in the crisis that inventiveness, discoveries and great strategies arise.

He who overcomes the crisis overcomes himself without being 'overtaken.'"

Albert Einstein

THE FOOD SECTOR

Pava Resine specialises in the production of resin formulations for protection against chemical, environmental and microbiological aggression in the industrial, food, water and purification sectors.

Floors, walls and ceilings, tank interiors and plants with certified formulas for food contact, the University of Padua, the Cà Foscari University of Venice, the Oenological Institute of Conegliano-Treviso and the CNR of Padua.

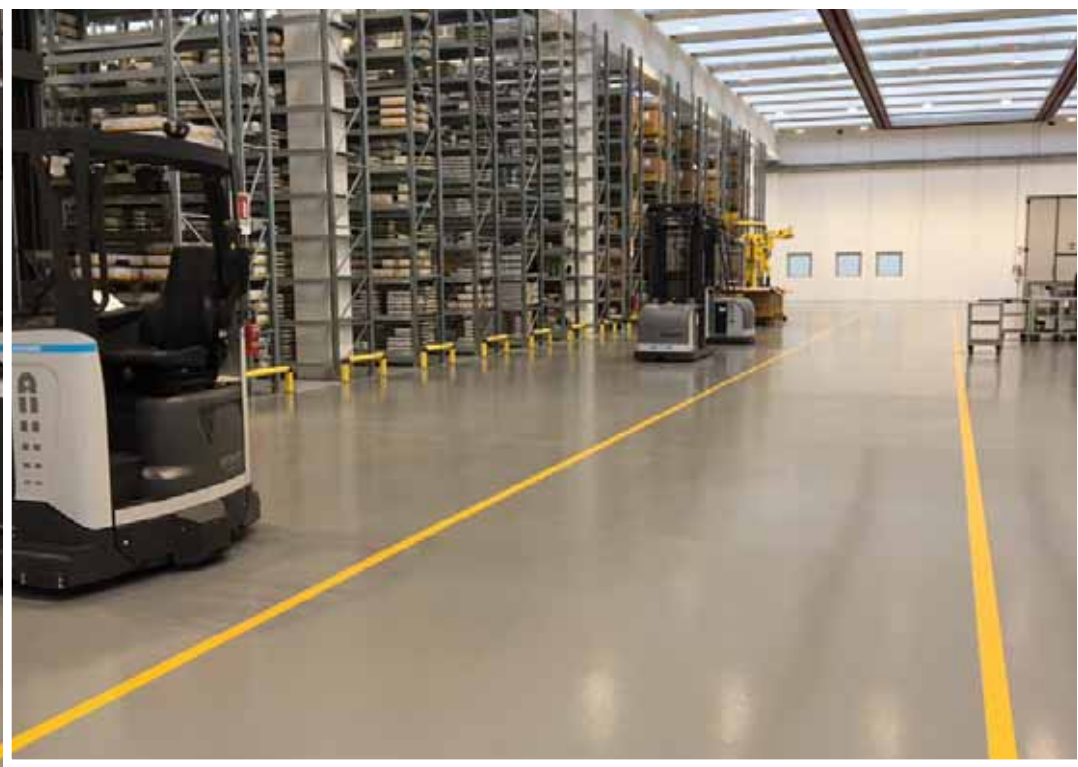

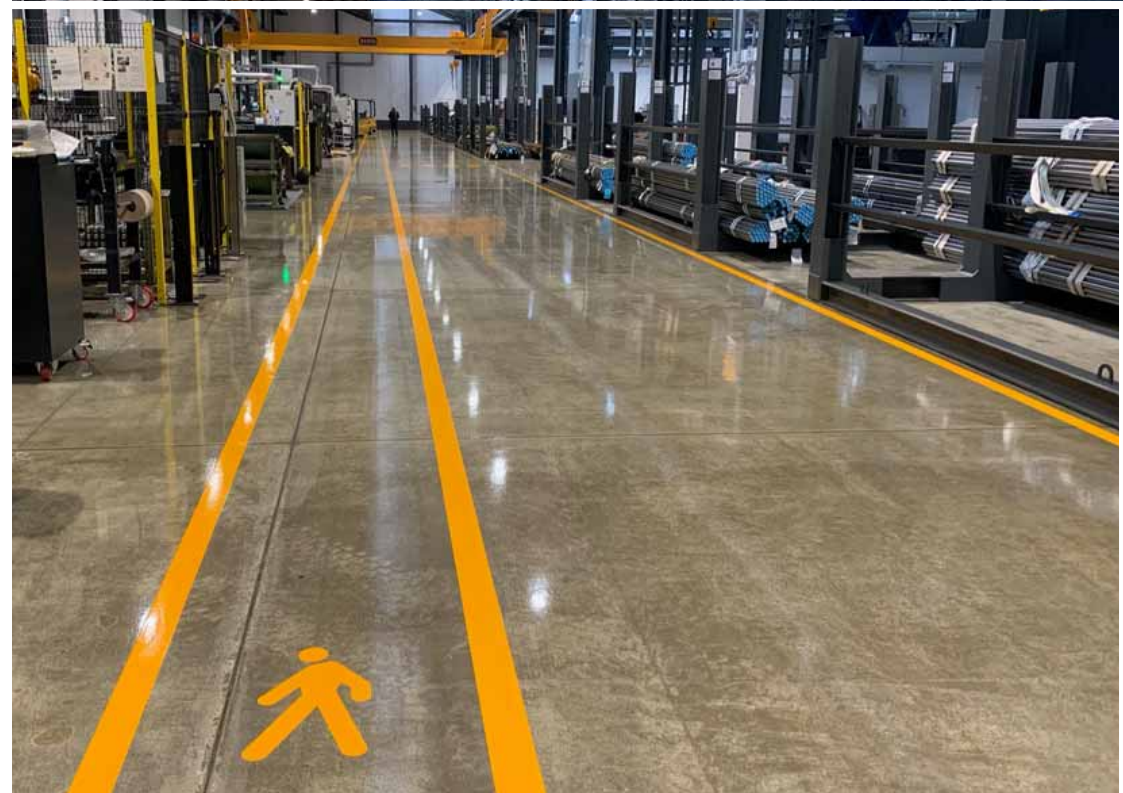

"Leaders, great leaders, are people who have a phenomenal ability to design and redesign creative collaborative relationships within their teams."

Sergio Marchionne

THE INDUSTRIAL SECTOR

In the industrial sector there are countless types of intervention possible thanks to the range of products developed internally in the San Martino di Lupari plant. The production of resin formulations is diversified in the field of protection from chemical, environmental and microbiological aggression in the industrial, food, water and purification sectors.

The Company provides a storage of 120 tons of product that allows an intervention with very short production times, the possibility to develop the product in any color, assistance and availability in the inspections to find the best solution.

WATERPROOFING SYSTEMS

Pava Resine develops effective systems for the building industry. Thanks to its ability to identify new construction technologies well in advance, Pava Resine today stands on the market as a leader in the research, production and marketing of polyurethane and epoxy products and systems.

Constant investment in research and technological development and proven managerial experience enable the development of innovative, high quality products and systems on a daily basis. The products and systems on offer achieve the best results even under the worst exposure conditions. Pava Resine waterproofing systems are recommended for many surfaces.

Pava Resine offers great attention to designers, site managers and contractors by constantly passing on knowledge about the products and systems produced through training and support services.

**"True beauty is often hidden from most, but revealed
to the chosen souls."**

Giovanni A. Barraco

THE DECORATIVE SECTOR

Since 2009, PAV-ART has been dedicated to new technologies in the areas of restoration, consolidation and surface restoration, as well as in interior architecture, furnishings and giftware.

Lines of products with high functionality that make use of the consolidated characteristics of the industrial product, always epoxy or polyurethane based and always applied manually by qualified and highly specialized personnel.

The most frequent applications are in the residential, office and hotellerie sectors, both during construction and during renovation or renewal of internal surfaces.

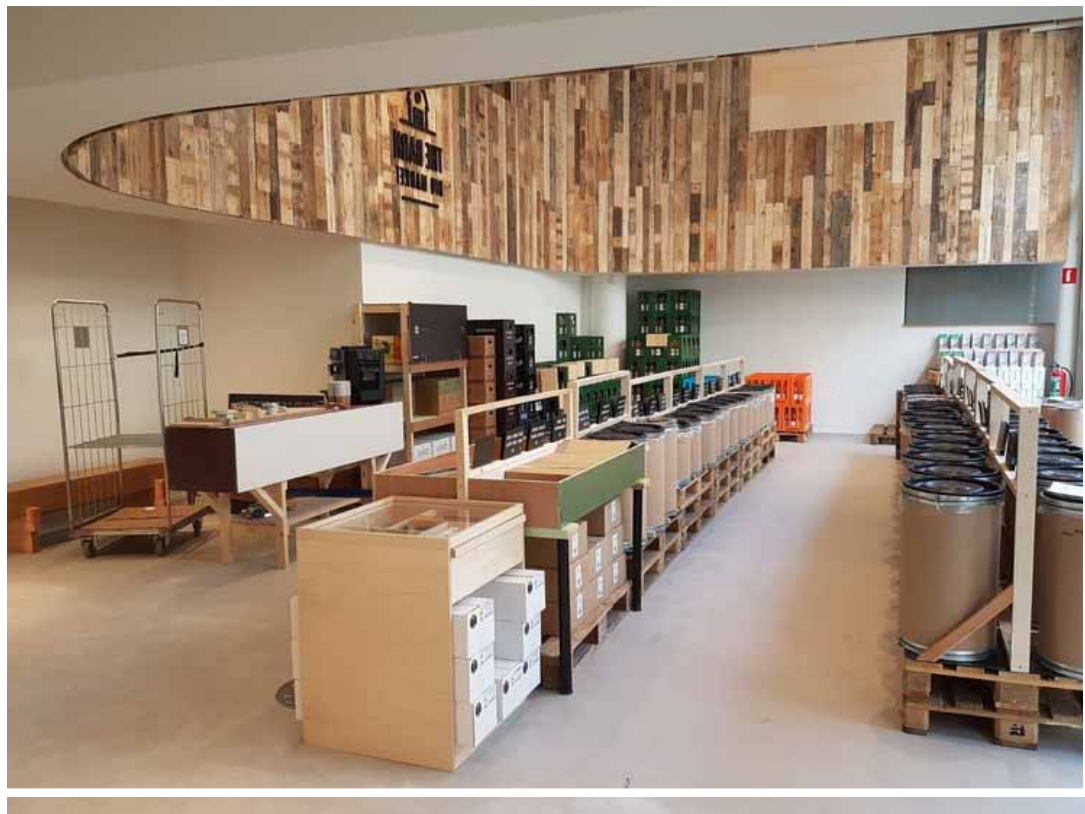

"Quality is meeting the customer's needs and exceeding his own expectations while continuing to improve."

William Edwards Deming

THE SWIMMING POOLS

As far as outdoor flooring is concerned, more and more people are choosing resin for covering large surfaces with forklift and truck traffic, thanks to its protection, cleanliness and resistance to atmospheric agents. For these same characteristics, resin is used in the construction or maintenance of swimming pools and large amusement parks.

Finishes able to satisfy the chemical/perceptive fundamentals of physical and mental well-being make the pool a place to be dedicated to the regeneration of mind and body.

**"Don't ignore your past if you care about
your future."**

Antonio Aschiarolo

RESEARCH AND DEVELOPMENT

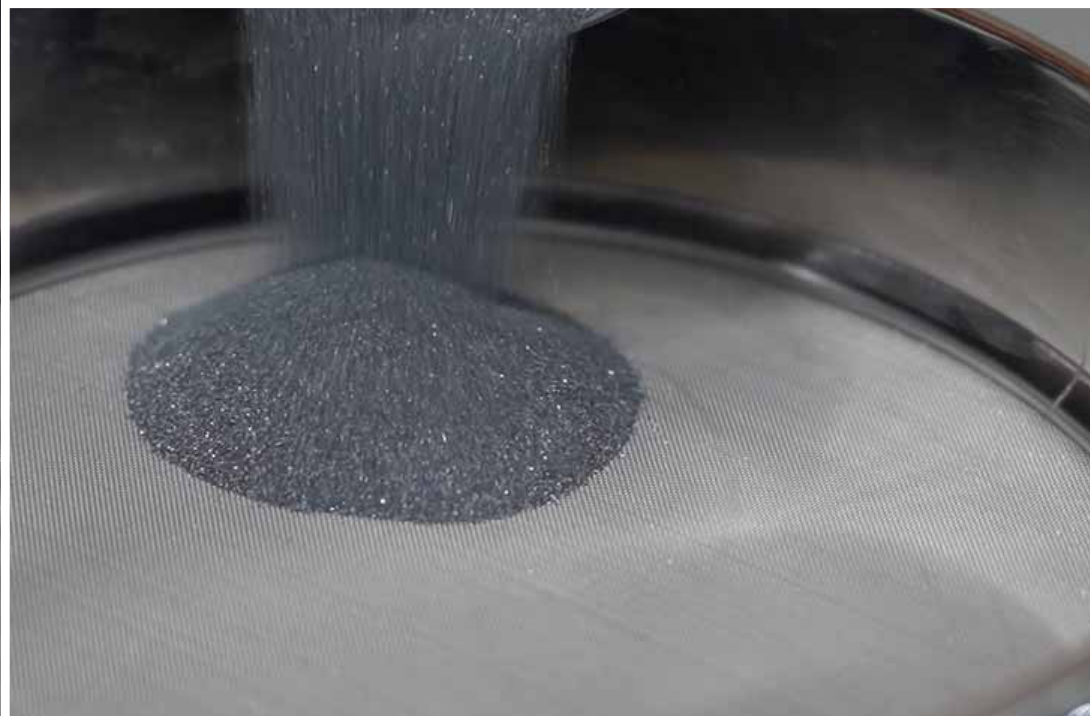

Pava Resine, in more than 40 years of activity, has innovated and diversified the production of resin formulations in the field of protection against chemical, environmental and microbiological aggression in both the industrial and decorative sectors.

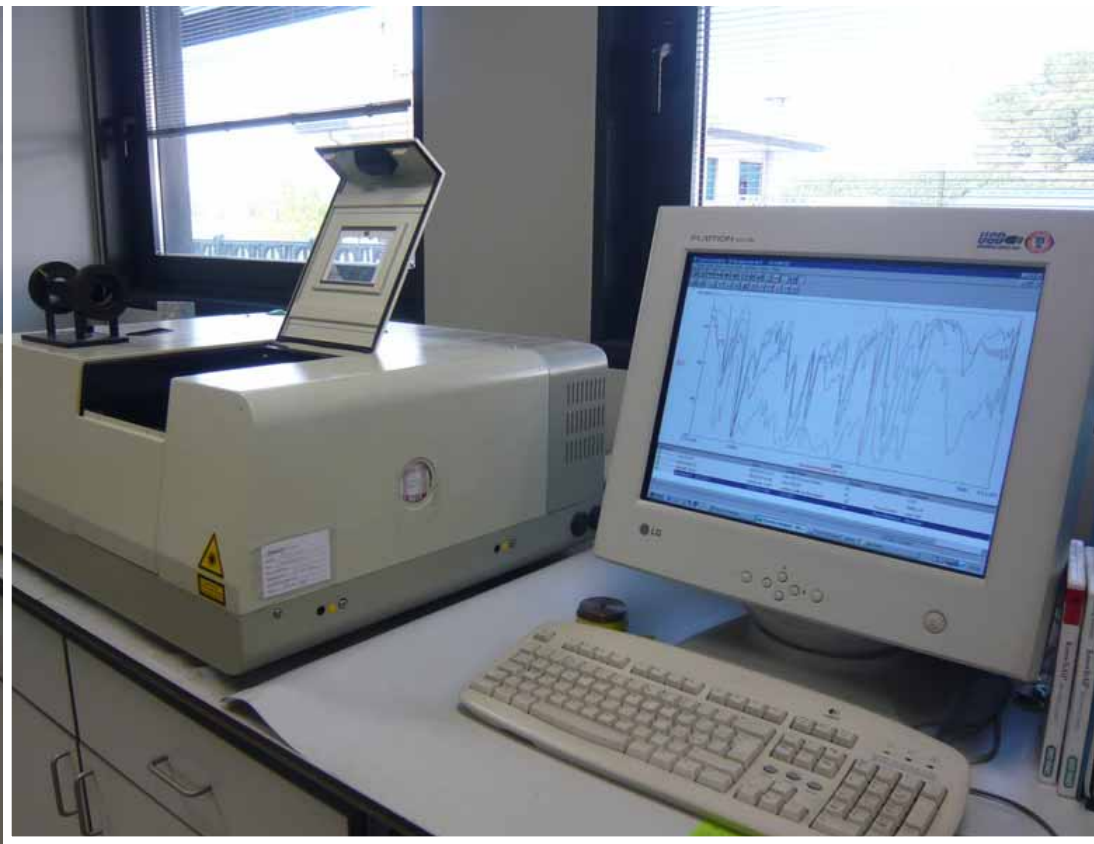

For production control, Pava Resine has set up an in-house research and development laboratory that is actively engaged with qualified partners also with the aim of developing new products and application technologies.

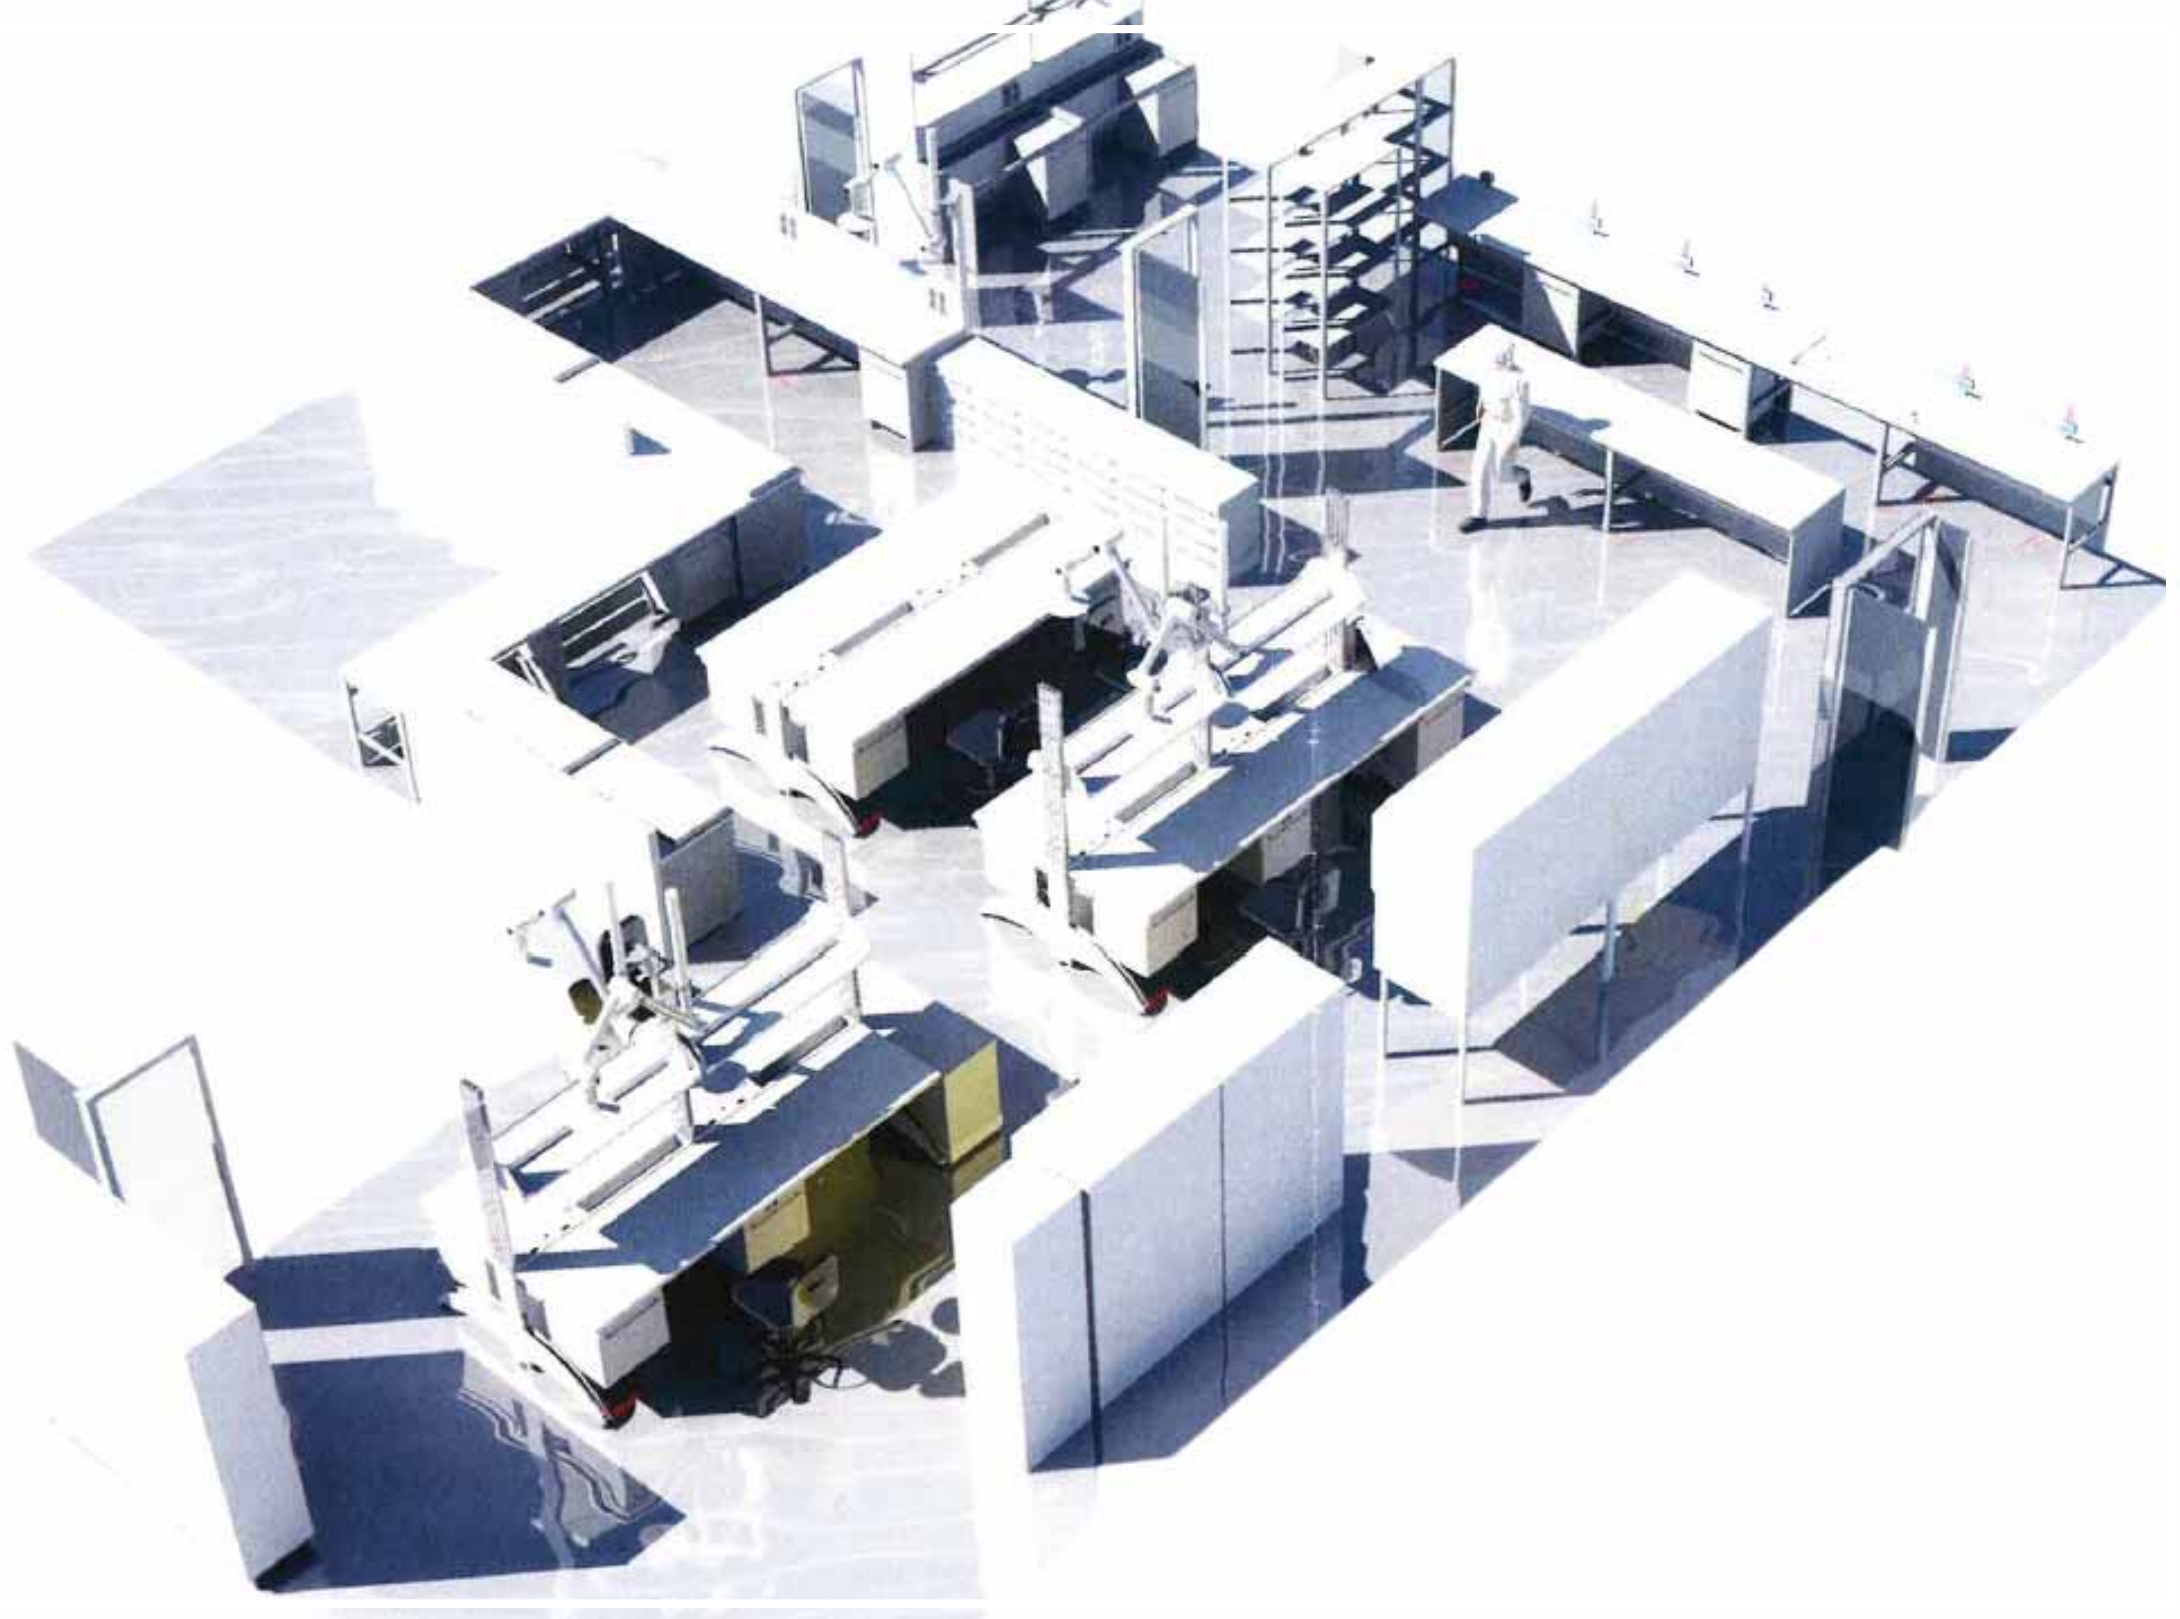

This has led to active collaboration with the University of Padua, the Cà Foscari University of Venice, the Oenological Institute of Conegliano-Treviso and the CNR of Padua.

"Satisfying every single need and customizing the product according to different needs quickly": this is what has made Pava Resine a reliable partner.

Numerous patents have been filed with a continuous search for new technical and functional solutions.

"Experience is the noblest of
arts."

A. Einstein

CERTIFICATIONS

Common denominator in all divisions of the company is the word quality: quality in production, quality in research, quality in training and quality in dealing with the market.

The quality certifications desired and obtained in recent years (UNI EN ISO 9001-2000, ENCOPIER R-102, Suitability for food contact (EEC), Flammability, Asbestos Encapsulation, Antibacterial Resin Films, Anti-slip surfaces) are not only brands to be displayed in the company forms, but a commitment made with customers and are continuously monitored with an internal specification.

Research, experience, continuous monitoring of the market, quality improvement, assistance and attention are the peculiarities that contribute to making Pava Resine a well-trained interlocutor, a qualified supplier and an ideal partner for any need.

**Certificazione di Qualità UNI EN ISO 9001
Certiquality**

Dal 1997 Sistema di Gestione Qualità
conforme alla norma UNI EN ISO 9001.

**Certificazione Ambientale UNI EN ISO 14001
Certiquality**

Sistema di Gestione Ambientale conforme alla
norma UNI EN ISO 14001.

**Certificazione FDA – Food and Drug
Administration**

Degli Stati Uniti d'America per la
regolamentazione dei prodotti alimentari e
farmaceutici

Accreditamento Green Building

Certificazione LEED sviluppate da Green
Building Council per la progettazione e
costruzione di edifici ecocompatibili

Ministero delle Sviluppo Economico

Brevetto Sistema Maltelastiche

Malte cementizie elastomerizzate per
applicazioni su strutture sollecitate

**Certificazione Rivestimenti Antibatterici
per fuganti e coating**

Polizza Assicurativa Decennale Postuma

Emissione secondo UNI CEI EN ISO IEC
17020 Polizza Assicurativa Decennale
Postuma da Primario Ist. Bancario.

Certificazione RINA

Certificazione per i prodotti, componenti e
materiali attinenti a servizi essenziali
installati a bordo di navi classificate RINA

Ente Nazionale Costruttori Pavimenti

Socio fondatore di ENCOPER: Ente Nazionale Costruttori Pavimenti e Rivestimenti.

Formulati Marcati CE

Audit con organismo competente notificato n°0546 Certiquality – 0546 CPR 24049

Certificazione Emissione VOC (UNI 16000)

Basso contenuto di VOC conforme alle norme internazionali (EMICODE ECI)

Certificazione Superfici Antisdrucciolo

Superfici antisdrucciolo idonee per ambienti ad uso industriale ed alimentare

Certificazione Internazionale IQNET

Certificazione internazionale IQNet conforme alla norma UNI EN ISO 9001

Certificazione Reazione al Fuoco

Formulati conformi alla normativa EN 13501 – 1 ed altre

Certificazione Idoneità Contatto Alimentare

Prodotti certificati ed idonei al contatto diretto con gli alimenti

Ministero dello Sviluppo Economico

Brevetto Sistemi BIO da Risorse Vegetali

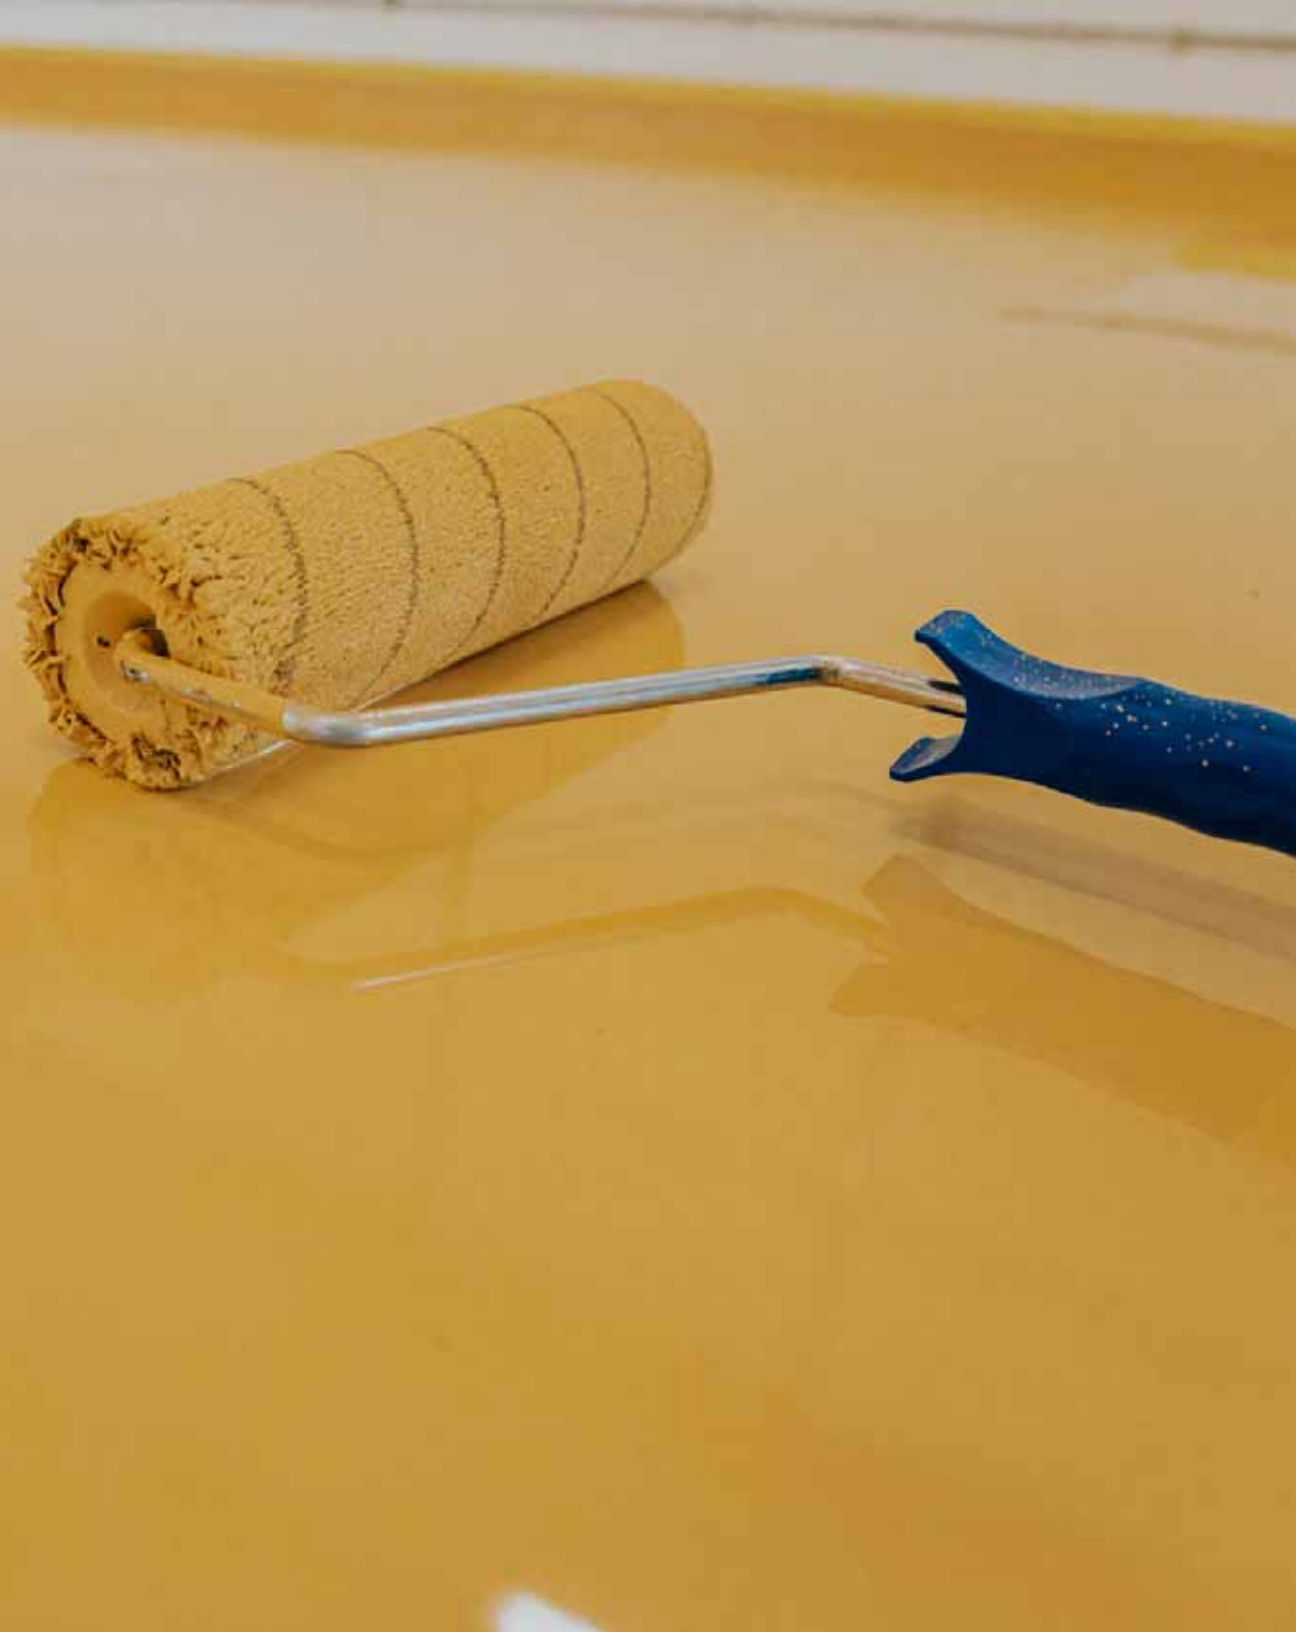

Bio-Resine per un'architettura sostenibile – Brevetto n°1397539

Socio Confindustria Padova

Certificazione di resistenza alla permeabilità del Radon

**"Education and training are the most powerful
weapons that can be used to change the world."**

Nelson Mandela

THEORETICAL APPLICATION COURSES

Pava Resine periodically organizes theoretical courses practical for installers in order to support them and support them in learning new materials, features techniques and applications.

Such knowledge is in fact crucial to discover and enhance the characteristics and potential of each individual product, to be applied to each specific need.

"Furnishing doesn't mean making sets, it doesn't mean making beautiful pictures for magazines; it's rather creating a quality of life, a beauty that nourishes the soul."

Albert Hadley

OUR SHOWROOM

In September 2019, a themed showroom for the decorative sector was inaugurated at our plant in San Martino di Lupari.

This makes it possible to provide a large scale view of resin coatings associated with various home environments.

Available for visits by architects, interior design and people in the sector, to immerse themselves in the material atmosphere created by the resin used in all its forms.
